**Heating / Air-conditioning / Ventilation****In-line Twin Pumps****Etaline Z**

**i** The product illustrated as an example may include options incurring a surcharge.

**Main applications**

- Service water supply systems
- Heating systems
- Industrial recirculation systems
- Air-conditioning systems
- Cooling circuits
- Water supply systems<sup>1)</sup>

**Fluids handled**

- Fluids not chemically or mechanically aggressive to the materials

**Further information on fluids handled**

Overview of fluids handled (⇒ Page 10)

<sup>1)</sup> No drinking water in acc. with UBA (German drinking water regulations to German Environment Agency)

<sup>2)</sup> The sum of inlet pressure and shut-off head must not exceed the value indicated.

## Design details

### Design

- In-line twin pump in closed-coupled design
- Single-stage
- Horizontal installation / vertical installation
- Rigid connection between pump and motor
- Back pull-out design
- Fixed speed version (without PumpDrive 2 / PumpDrive 2 Eco / PumpDrive R) / variable speed version (with PumpDrive 2 / PumpDrive 2 Eco / PumpDrive R)

### Pump casing

- Radially split volute casing
- In-line design

### Drive (fixed speed version)

#### Standard design:

- KSB/Siemens surface-cooled IEC frame three-phase squirrel-cage motor
- Efficiency class IE2 (size 71/80) / IE3 (from size 90) to IEC 60034-30
- Rated voltage (50 Hz) 230 V / 400 V  $\leq$  2.20 kW
- Rated voltage (50 Hz) 400 V / 690 V  $\geq$  3.00 kW
- Rated voltage (60 Hz) - / 460 V  $\leq$  2.20 kW
- Rated voltage (60 Hz) 460 V / -  $\geq$  3.00 kW
- Type of construction IM V1
- Enclosure IP55
- Duty type: continuous duty S1
- Thermal class F with temperature sensor, 1 PTC thermistor (size 80/90) / 3 PTC thermistors (from size 100)

#### Explosion-proof design:

- KSB surface-cooled IEC three-phase current squirrel-cage motor
- Efficiency class IE2 / IE3 to IEC 60034-30
- Rated voltage (50 Hz) 230 V / 400 V  $\leq$  2.50 kW
- Rated voltage (50 Hz) 400 V / 690 V  $\geq$  3.30 kW
- Rated voltage (60 Hz) - / 460 V  $\leq$  2.50 kW
- Rated voltage (60 Hz) 460 V / -  $\geq$  3.30 kW
- Type of construction IM V1
- Enclosure IP55
- Duty type: continuous duty S1
- II 3G Ex ec IIC T3 Gc
- II 2G Ex eb IIC T3 Gb
- II 2G Ex db (eb) IIB T4 Gb
- II 2G Ex db (eb) IIC T4 Gb

### Drive (variable speed version)

#### KSB SuPremE motor:

- Surface-cooled KSB SuPremE motor, IEC-compatible, magnetless synchronous reluctance motor<sup>3)</sup> (PumpDrive 2 / PumpDrive 2 Eco / PumpDrive R required)
- Efficiency class IE4 / IE5 to IEC TS 60034-30-2:2016
- Mounting points to EN 50347:2001
- Envelope dimensions to DIN VDE 42673-4:2011-07
- Type of construction IM V1
- Enclosure IP55
- Duty type: continuous duty S1
- Thermal class F with temperature sensor, 3 PTC thermistors
- Shaft centreline height 71 to 225 mm
- Rated power 0.55 kW to 45 kW
- Rated speed 1500 rpm or 3000 rpm
- Frequency 50 Hz / 60 Hz (PumpDrive input)
- Voltage 380 V to 480 V (PumpDrive input)

#### KSB SuPremE X1:

- With terminal box for connecting to PumpDrive 2 or PumpDrive R for mounting on walls and in control cabinets

#### KSB SuPremE X2:

- Equipped for being fitted with a motor-mounted PumpDrive 2

#### PumpDrive 2 / PumpDrive 2 Eco:

- Self-cooling frequency inverter of modular design for the continuously variable speed control of asynchronous motors and synchronous reluctance motors by means of analog standard signals, a field bus or the control panel
- Identical design of frequency inverter for motor mounting, wall mounting and cabinet mounting
- Mains voltage 3~ 380 V AC -10 % to 480 V AC +10 %
- Mains frequency 50 Hz to 60 Hz  $\pm$  2 %

#### PumpDrive R:

- Self-cooling frequency inverter of modular design for the continuously variable speed control of asynchronous motors and synchronous reluctance motors, such as KSB SupremE motors or permanent magnet synchronous motors, by means of analog standard signals, a field bus or the control panel
- Identical design of frequency inverter for the mounting types wall mounting and cabinet mounting
- Mains voltage 3~ 380 V AC -10 % to 480 V AC +10 %
- Extended mains voltage range (on request)
- Mains frequency 50 Hz to 60 Hz  $\pm$  2 %
- Extended power range with a nominal power of 110 kW (standard) or 1400 kW (on request)

#### PumpMeter:

- Intelligent pressure transmitter for pumps, with on-site display of measured values and operating data
- For recording the load profile of the pump
- Supplied completely assembled and parameterised for the individual pump

#### KSB Guard

- System for monitoring the pump's condition by means of temperature and vibration sensors
- Measured values and operating data may be retrieved via the KSB Guard app and the web portal at any time.

<sup>3</sup> Motor sizes 0.55 kW / 0.75 kW with 1500 rpm are designed with permanent magnets.

### Shaft seal

- Standardised mechanical seal to EN 12756
- Shaft equipped with replaceable shaft protecting sleeve in the shaft seal area

### Twin pump

- Two separate centrifugal pump hydraulic systems in one pump casing with a spring-loaded changeover flap located in the discharge nozzle
- Changeover flap housing made of Rilsan (nominal diameter 32 to 80)
- Changeover flap housing made of bronze (nominal diameter 100 to 200 inclusive)
- Flaps, springs, stems made of chrome steel
- Manual venting of the mechanical seal chamber through two integrated vent valves
- Single-pump operation (stand-by operation) / parallel operation (additional pump start-up in case of peak load)
- Redundant dual-pump operation through M12 module (accessory) without higher-level controller

### Impeller type

- Closed radial impeller

### Bearings

- Radial ball bearings in the motor housing
- Grease lubrication

## Coating and preservation

- Coating and preservation to KSB standard

## Product benefits

- Maximum energy efficiency through demand-driven operation in combination with KSB SuPremE IE4/IE5 motor<sup>4)</sup> to IEC TS 60034-30-2:2016
- PumpDrive 2 / PumpDrive 2 Eco perfectly matched to pump and motor by default factory parameter settings
- Motor-mounted variable speed system up to 45 kW saves space
- Pump operation made fully transparent with PumpMeter

## Product information

### Product information as per Regulation No. 1907/2006 (REACH)

For information as per European chemicals regulation (EC) No. 1907/2006 (REACH) see <https://www.ksb.com/en-global/company/corporate-responsibility/reach>.

### Product information as per Regulation No. 547/2012 (for water pumps with a maximum shaft power of 150 kW) implementing "Ecodesign" Directive 2009/125/EC

- Minimum efficiency index: see data sheet
- The benchmark for the most efficient water pumps is MEI  $\geq 0.70$ .
- Year of construction: see data sheet
- Manufacturer's name or trade mark, commercial registration number and place of manufacture: see data sheet or order documentation
- Product's type and size identifier: see data sheet
- Hydraulic pump efficiency (%) with trimmed impeller: see data sheet
- Pump performance curves, including efficiency characteristics: see documented characteristic curve
- The efficiency of a pump with a trimmed impeller is usually lower than that of a pump with the full impeller diameter. Trimming of the impeller will adapt the pump to a fixed duty point, leading to reduced energy consumption. The minimum efficiency index (MEI) is based on the full impeller diameter.
- Operation of this water pump with variable duty points may be more efficient and economic when controlled, for example, by the use of a variable speed drive that matches the pump duty to the system.
- Information relevant for disassembly, recycling or disposal at end of life: see installation/operating manual
- Information on benchmark efficiency or benchmark efficiency graph for MEI = 0.70 (0.40) for the pump based on the model shown in the Figure are available at: <http://www.europump.org/efficiencycharts>

## Acceptance tests and warranty

The following acceptance tests may be performed at a surcharge:

- Materials testing

- Test report 2.2

- Final inspection

- Inspection certificate 3.1 to EN 10204

- Hydraulic test

- The duty point of each pump is guaranteed according to ISO 9906/2B or ISO 9906/3B.
- NPSH test

- Other inspections/tests on request

## Warranties

- Warranties are given within the scope of the valid delivery conditions.

<sup>4)</sup> Motor sizes 0.55 kW / 0.75 kW with 1500 rpm are designed with permanent magnets.

<sup>8)</sup> Treatment to VdTÜV 1466, additional requirement: O2 t ≤ 0.02 mg/l

<sup>9)</sup> Antifreeze on ethylene glycol basis with inhibitors, content > 20 % to 50 %

<sup>10)</sup> No pure water, electrical conductivity at 25 °C: ≤ 800 µS/cm, neutral with regard to chemical corrosion

<sup>11)</sup> France: Observe the rules as per ministerial order dated 18 January 2002.

<sup>12)</sup> For France, ACS approval is required.

**Overview of functions for variable speed version**
**Table 11:** Overview of functions

Functions / firmware	PumpDrive 2	PumpDrive 2 Eco
<b>Protective functions</b>		
Thermal motor protection	x	x
Mains voltage monitoring	x	x
Phase failure, motor side	x	x
Short-circuit monitoring, motor side (phase to phase and phase to earth)	x	x
Dynamic overload protection by speed limitation ( $i^2t$ control)	x	x
Resonant frequency suppression	x	x
Broken wire detection (live zero)	x	x
Protection against dry running and hydraulic blockage (sensorless due to learning function)	x	x
Dry running protection (external control signal)	x	x
Operating point estimation and characteristic curve control	x	x
<b>Open-loop control</b>		
Open-loop control mode	x	x
<b>Closed-loop control</b>		
Closed-loop control mode via integrated PID controller	x	x
Pressure control / differential pressure control ( $\Delta p$ const)	x	x
Pressure control / differential pressure control with dynamic pressure compensation ( $\Delta p$ var)	x	x
Flow rate control	x	x
Sensorless differential pressure control ( $\Delta p$ const) in a single-pump configuration	x	x
Sensorless differential pressure control with dynamic pressure compensation ( $\Delta p$ var) in a single-pump configuration	x	x
Sensorless flow rate control	x	x
Level control	x	x
Temperature control	x	x
Alternative setpoint	x	-
<b>Operation and monitoring (display)</b>		
Measured value display (pressure, head, speed, electric power, motor voltage, motor current, torque)	x	x
Fault history	x	x
Operating hours counter	x	x
Fault reporting via relay	x	x
<b>Frequency inverter functions</b>		
Programmable start ramps and stop ramps	x	x
Field-oriented control (vector control), V/f control	x	x
Configurable motor control method (asynchronous motor, KSB SuPremE)	x	x
Automatic motor adaptation (AMA)	x	x
Motor standstill heater	x	x
Manual-0-automatic mode	x	x
External OFF	x	x
External minimum speed	x	x
Sleep mode (stand-by mode)	x	x
Energy savings meter	x	-
<b>Pump functions</b>		
Flow rate estimation	x	x
M12 module with PumpMeter bus connection	x	x
M12 module for dual-pump configuration	x	x
M12 module for multiple pump configuration with up to 6 pumps	x	x
Functional check run	x	x
Deragging	x	x
Integrated dual-pump configuration (1x100 % with redundant pump or 2x50 % without redundant pump)	x	x
Multiple pump configuration with up to 6 pumps	x	x
Waste water function: start-up at maximum speed	x	-
Waste water function: rinsing function	x	-
<b>Operation</b>		

Functions / firmware	PumpDrive 2	PumpDrive 2 Eco
Control panel	X	X <sup>13)</sup>
Commissioning wizard	X	X <sup>14)</sup>
Favourites list	X	-
Service interface	X	X

### Pressure limits and temperature limits

#### Test pressure limits and temperature limits

Table 12: Pressure limits and temperature limits as a function of material variant

Material variant	Fluid temperature <sup>15)16)</sup>	Test pressure <sup>17)</sup>
	[°C]	[bar]
GG, GC, GB	-30 to +140	≤ 21

#### In-service pressure limits and temperature limits

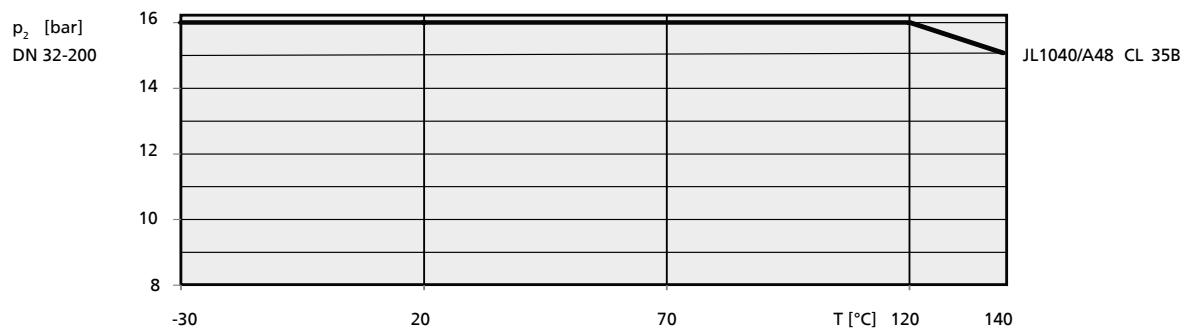

Fig. 1: Operating pressure limits and temperature limits

<sup>13</sup> Some functions can only be parameterised and/or displayed using the KSB ServiceTool (see operating manual).

<sup>14</sup> Only available via KSB ServiceTool or app

<sup>15</sup> For hot water heating systems to DIN 4752, Section 4.5, application limits must be observed.

<sup>16</sup> For fluid temperatures >140 °C use Etanorm SYT.

<sup>17</sup> The casing components have been checked for leakage by means of internal pressure tests to ZN 1650 with water.

**Technical data**

## Characteristic curves

### General

#### Test class

Characteristic curves to ISO 9906 Class 3B

#### NPSH values

The NPSH values indicated in the characteristic curves correspond to a head drop of 3 %.

#### NPSH values in part-load conditions

NPSH values for flow rates below  $Q = 0.3 \times Q_{BEP}$  can only be measured with intense technical efforts. Evidence of NPSH values in the part-load range cannot be provided.

### Density of the fluid handled

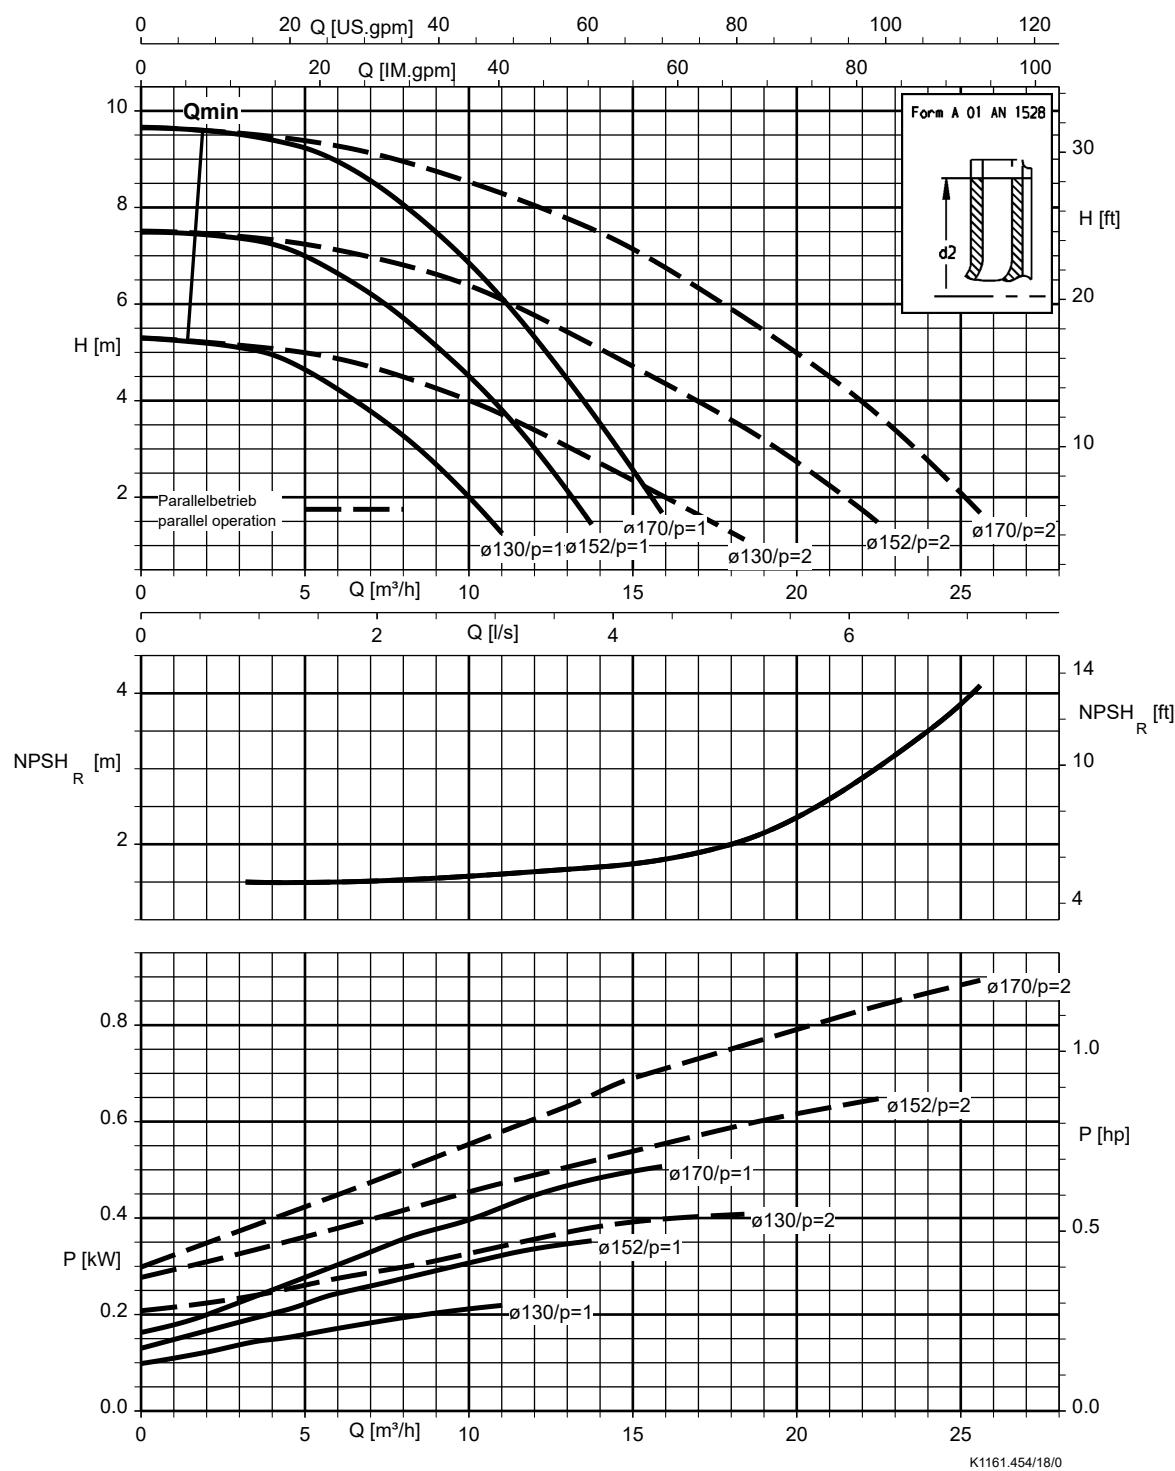

The indicated heads and performance data apply to pumped fluids with a density  $\rho = 1.0 \text{ kg/dm}^3$  and a kinematic viscosity of up to  $20 \text{ mm}^2/\text{s}$  max. If the density  $\neq 1.0$ , the performance data must be multiplied by  $\rho$ . For a viscosity  $> 20 \text{ mm}^2/\text{s}$  the corresponding data for cold water has to be calculated and the impact on the pump's performance has to be determined.

### Correction factors

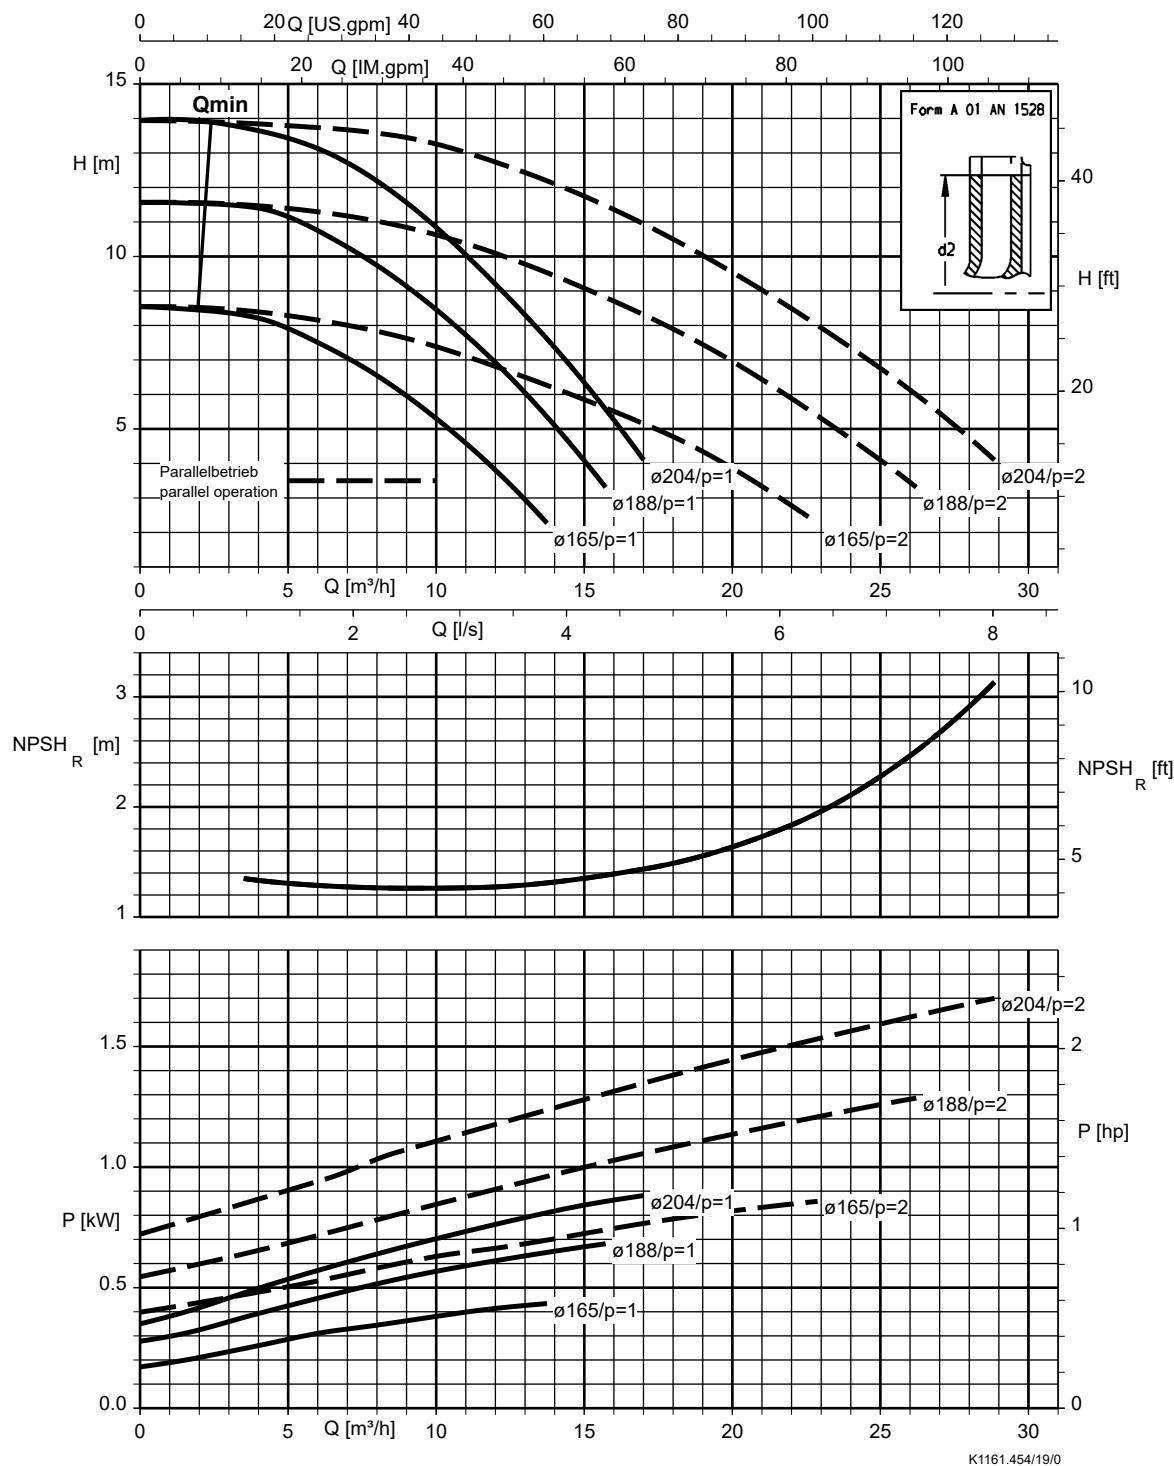

The characteristic curves apply to pumps with cast iron or bronze impellers. When using an impeller made of cast steel materials the efficiency and pump power of the corresponding pump sizes have to be multiplied by the correction factors indicated in the characteristic curves.

**Table 23:** Flange design by materials

Material variant	Standard	Nominal size	Pressure class
GG, GB, GC	EN 1092-2	DN 32 - DN 200	PN 16
	Drilled to ASME B16.1 <sup>26)</sup>	DN 32 - DN 100, DN 150 and DN 200	Class 125

<sup>26)</sup> DN 80 machined like DN 100

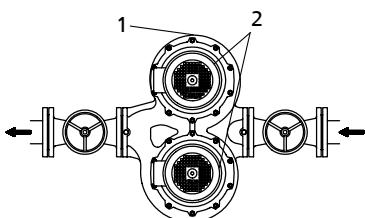

## Installation types

### Horizontal installation

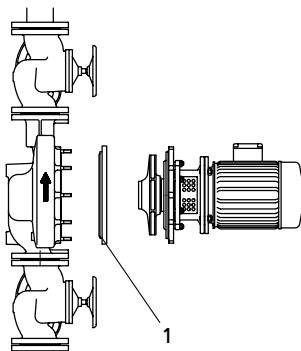

**Fig. 8:** Horizontal installation, direction of flow from bottom to top

**i** Motors of size 180 (18.5 kW) and above on pump sets with horizontal motor axis need to be supported adequately. Use the foot fastening holes at the motor housing for this purpose.

**Fig. 9:** Horizontal piping, 1 = screw plug 6D.1/2 and 2 = valve 5B.1/2

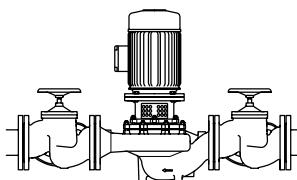

**i** To ensure trouble-free operation if the piping is laid horizontally, vent the upper pump through upper screw plug 6D.1/2 and valve 5B.1/2.

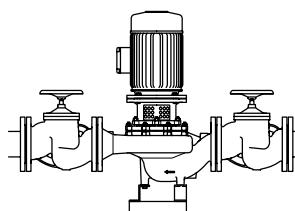

**Fig. 10:** Horizontal installation with blind flange (1 = blind flange, accessory)

**i** If one of the pumps needs to be serviced, shut the pump chamber off with a blind flange. The pump installation will remain functional.

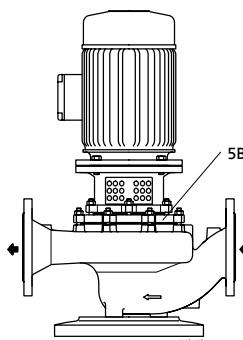

### Vertical installation

**Fig. 11:** Vertical installation / fastening without pump foot, sizes 032-032-160 to 080-080-250

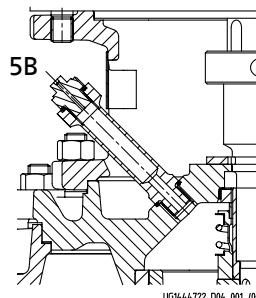

**Fig. 12:** Vertical installation / fastening with three angle feet (steel 37, accessories depend on the pump size), sizes 032-032-160 to 200-200-315

**Fig. 13:** Vertical installation, vent valve to prevent dry running of the mechanical seal

**i** For vertical installation with motor on top, use connection 5B for venting.

**Fig. 14:** Vent, mechanical seal chamber

**i** Use vent valve 5B for venting the mechanical seal chamber.

**Accessories**
**Pump accessories**
**Table 24:** Pump accessories

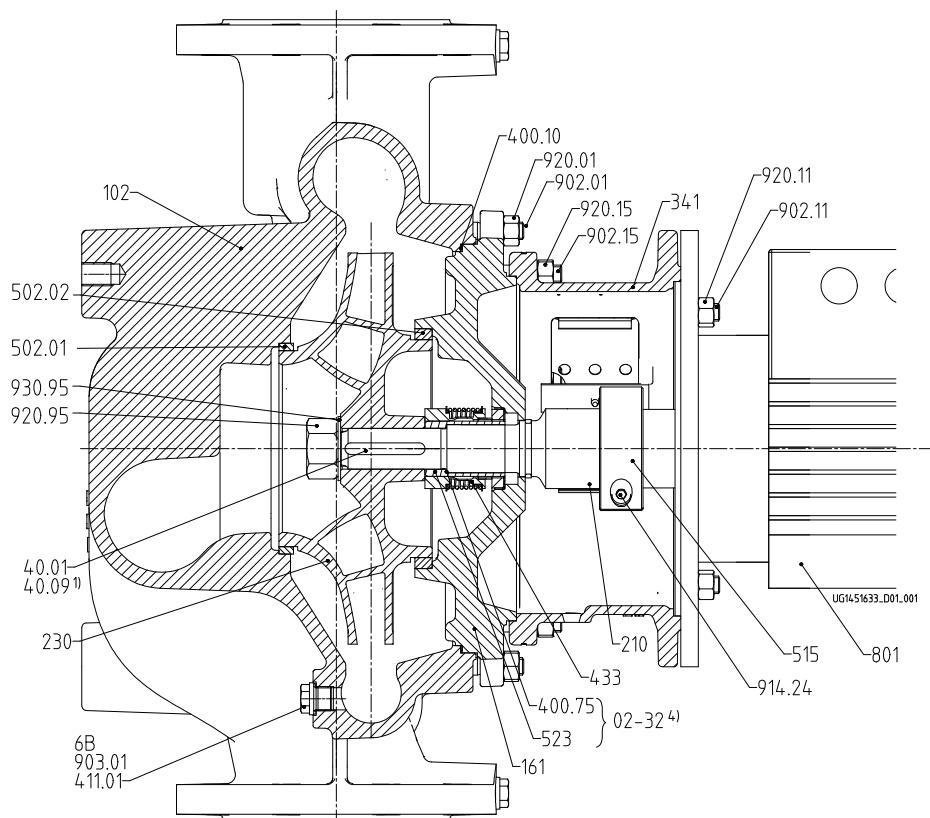

Item	Description	Connection	Mat. No.	[kg]

## Glossary

### ACS

French drinking water regulations (ACS = Attestation de Conformité Sanitaire)

### Back pull-out design

The complete back pull-out unit can be pulled out without having to remove the pump casing from the piping.

### Close-coupled design

Motor directly fitted to the pump via a flange or a drive lantern

### IE2

Efficiency class to IEC 60034-30: 2 = High Efficiency (IE = International Efficiency)

### IE3

Efficiency class to IEC 60034-30: 3 = Premium Efficiency (IE = International Efficiency)

### IE4

Efficiency class to IEC TS 60034-30-2:2016 = Super Premium Efficiency (IE = International Efficiency)

### IE5

Efficiency class to IEC TS 60034-30-2:2016 = Ultra Premium Efficiency (IE = International Efficiency)

### In-line design

A pump whose suction and discharge nozzle are arranged opposite each other and have the same nominal diameter.

### Mat. No.

This identification number is composed of an 8-digit numerical code that uniquely identifies a product entered in SAP.

### Mech. seal

Mechanical seal

### SU

Shaft unit

### UBA

German drinking water regulations to German Environment Agency

### WRAS

Approved by all water suppliers in the UK (WRAS = Water Regulations Advisory Scheme)
