Water Supply

Submersible Borehole Pumps

UPA S 200

Main applications

- Spray irrigation systems
- General irrigation systems
- Pressure boosting
- Groundwater management
- Water supply systems
- Offshore processes

Fluids handled

- Drinking water
- River water, lake water and groundwater
- Maximum sand content in fluid handled depending on particle size and duration, sand content up to 250 g/m³¹⁾

Operating data

Table 1: Operating properties

Characteristic		Value		
		50 Hz	60 Hz	100 Hz
Flow rate	Q [m ³ /h]	≤ 200	≤ 240	≤ 210
	Q [l/s]	≤ 56	≤ 67	≤ 58
Head	H [m]	≤ 360	≤ 360	≤ 395
Fluid temperature	T [°C]	≤ 50	≤ 50	≤ 50
Speed	n [rpm]	≤ 2900	≤ 3500	= 3000
Well diameter	D [mm]	> 200	> 200	> 200
	D ["]	≥ 8	≥ 8	≥ 8

Design details

Design

- Centrifugal pump
- Single-stage or multistage
- Single-suction
- Ring-section design
- Rigid connection between pump and motor

Type of installation

- Vertical installation
- Horizontal installation
- Angled installation

Drive

Asynchronous motor:

- With squirrel cage motor for submerged use
- Standard connection to NEMA
- Frequency 50 Hz/60 Hz
- IP68 enclosure
- DOL starting or star-delta starting
- Frequency of starts ≤ 15 starts per hour
- Winding J1 (UWM PPC) or, for higher temperatures, J2 (VPE / XLPE)

Synchronous motor:

- Interior (buried) permanent magnet synchronous motor (IPMSM)
- IP68 enclosure
- Standard connection to NEMA
- Frequency 100 Hz
- Winding J2 (VPE / XLPE)
- Frequency of starts ≤ 15 starts per hour

Electrical connection

- Delivered ex-factory with 1 or 2 motor leads (including earth conductor and internal earthing)
- Extension cable connected with water-tight cable connector
- Motor lead and extension cable suitable for drinking water use

Impeller type

- Mixed flow design

Bearings

- Radial plain bearings
- Pump bearings lubricated by fluid handled; motor bearings lubricated by water fill
- Axial thrust is balanced by a tilting-pad thrust bearing in the motor (lower end)
- Intermediate bearing in every stage

¹⁾ For 50 g/m³ and above, the more wear-resistant version with silicon carbide bearings and metal casing wear rings is recommended.

Connections

- Pump screw-ended or flanged

- With lift check valve or connection nozzle

Materials

Table 4: Pump material selection, UPA S 200

Component	Material variant	
	C	D
Impeller	CrNiMo steel (1.4408)	CrNiMo steel (1.4517)
Suction casing	CrNiMo steel (1.4408)	CrNiMo steel (1.4517)
Lift check valve body	CrNiMo steel (1.4408)	CrNiMo steel (1.4517)
Screws, bolts and nuts	CrNiMo steel (A4)	CrNiMo steel (1.4462)
Stage casing	CrNiMo steel (1.4408)	CrNiMo steel (1.4517)
Shaft	CrNiMo steel (1.4462)	CrNiMo steel (1.4462)

Table 5: Motor material selection, UMA 150, UMA-S 150, UMA 200, UMA-S 200, UMA 250, UMA-S 250

Component	Material variant				
	G	E	C	D	
Housing	UMA 150, UMA-S 150	-	CrNi steel (1.4301)	CrNiMo steel (1.4571)	CrNiMo steel (1.4539)
	UMA 200, UMA-S 200	Grey cast iron (EN-GJL-200)	-	CrNiMo steel (1.4408)	CrNiMo steel (1.4539)
	UMA 250, UMA-S 250	Grey cast iron (EN-GJL-200)	-	CrNiMo steel (1.4408)	CrNiMo steel (1.4539)
Screws, bolts and nuts	UMA 150, UMA-S 150	-	CrNiMo steel (A4-70)	CrNiMo steel (A4-70)	CrNiMo steel (1.4539)
	UMA 200, UMA-S 200	CrNiMo steel (A4-70)	-	CrNiMo steel (A4-70)	CrNiMo steel (1.4539)
	UMA 250, UMA-S 250	CrNiMo steel (A4-70)	-	CrNiMo steel (A4-70)	CrNiMo steel (1.4539)
Shaft	UMA 150, UMA-S 150	-	CrNi steel (1.4021)	CrNiMo steel (1.4462)	CrNiMo steel (1.4462)
	UMA 200, UMA-S 200	CrNiMo steel (1.4460)	-	CrNiMo steel (1.4460)	CrNiMo steel (1.4462)
	UMA 250, UMA-S 250	CrNiMo steel (1.4460)	-	CrNiMo steel (1.4460)	CrNiMo steel (1.4462)

Product benefits

- High efficiencies through optimised hydraulic design
- High operating reliability as all components are made of high-quality stainless steel.
- Overall efficiency can be increased further by combining the pump with an UMA S synchronous motor with ratings of up to 250 kW
- Reliable operation by anti-jam lift check valve
- Easy to install with service-friendly hydraulic system design
- Solids-induced wear can be minimised by metal wear rings and bearings with enhanced wear resistance (optional).
- Patented intake chamber provides optimum flow conditions at low heads.

Product information

Product information as per Regulation No. 1907/2006 (REACH)

For information as per European chemicals regulation (EC) No. 1907/2006 (REACH) see <https://www.ksb.com/en-global/company/corporate-responsibility/reach>.

Certifications

Table 6: Overview

Label	Effective in:	Comment
	All countries	Certified quality management to ISO 9001
	France	Approved in accordance with the French drinking water regulation

Overview of submersible motors

The following submersible motors are available:

Table 7: Selection table

Well diameter	Motor size	Voltage range	Rated power
6 inches	UMA 150	Up to 1 kV	5.5 to 37 kW
6 inches	UMA-S 150	Up to 1 kV	5.5 to 37 kW
8 inches	UMA 200	Up to 1 kV	37 to 90 kW
8 inches	UMA-S 200	Up to 1 kV	37 to 130 kW
10 inches	UMA 250	Up to 1 kV	85 to 190 kW
10 inches	UMA-S 250	Up to 1 kV	150 to 250 kW

- Further motor data for the UMA asynchronous motor see type series booklet No. 3455.51
- Further motor data for the UMA-S synchronous motor see type series booklet No. 3455.52

Technical data, 50 Hz

Information on characteristic curves

The characteristic curves shown are intended to allow pre-selection. Refer to the quotation for the precise selection data.

- Tolerance to ISO 9906 Cl. 2B
- Threaded end to DIN ISO 228, Part 1
- Flanged end to DIN EN 1092

Selection chart UPA S 200, 50 Hz, n = 2900 rpm

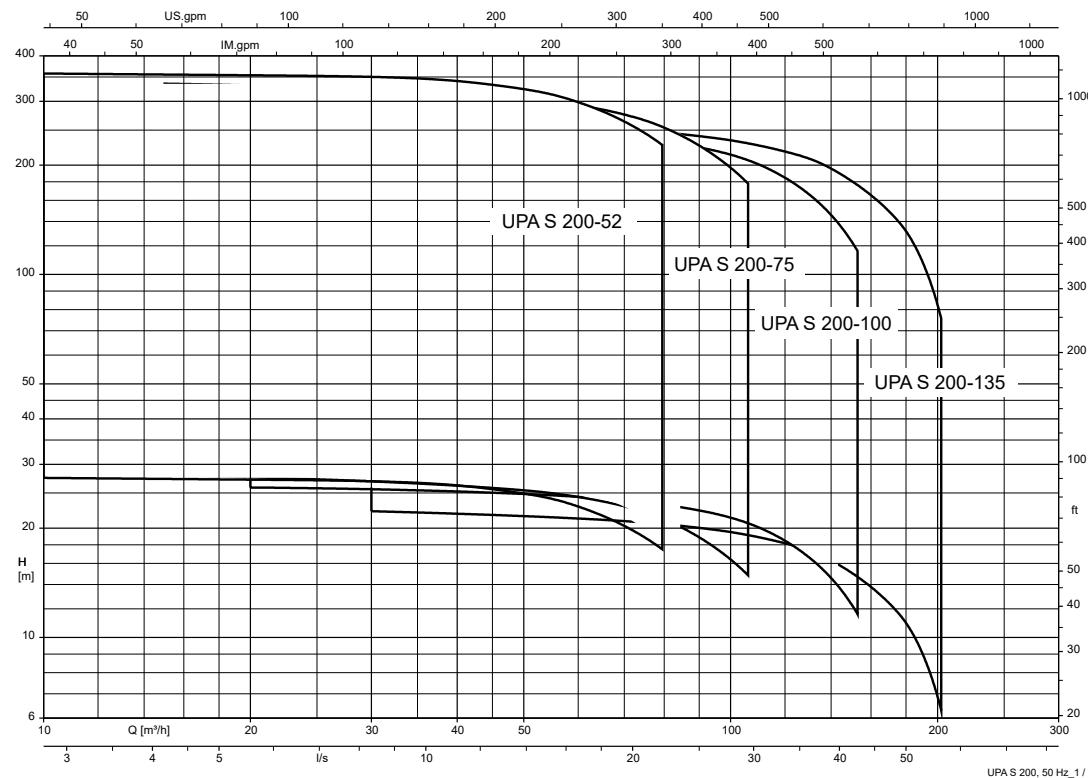

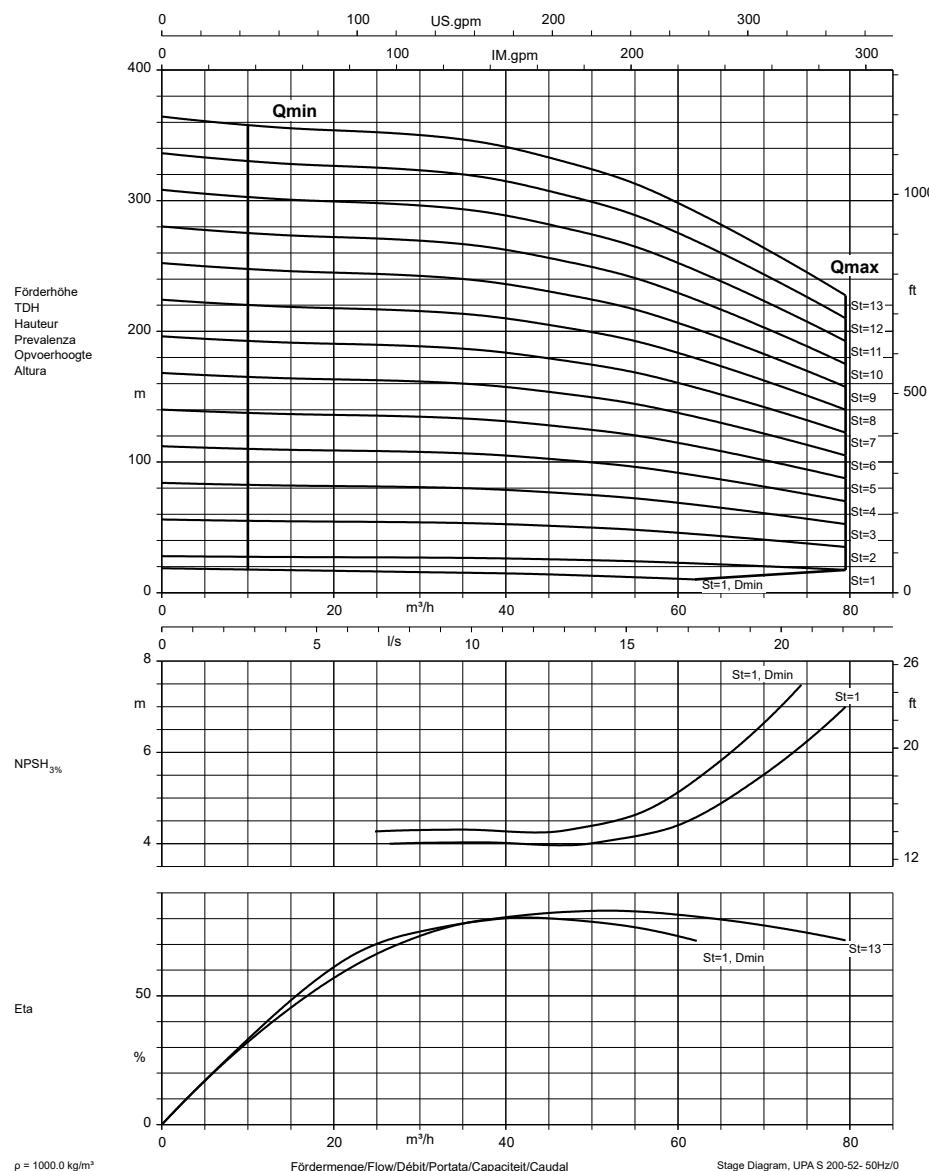

Fig. 1: Selection chart UPA S 200, 50 Hz

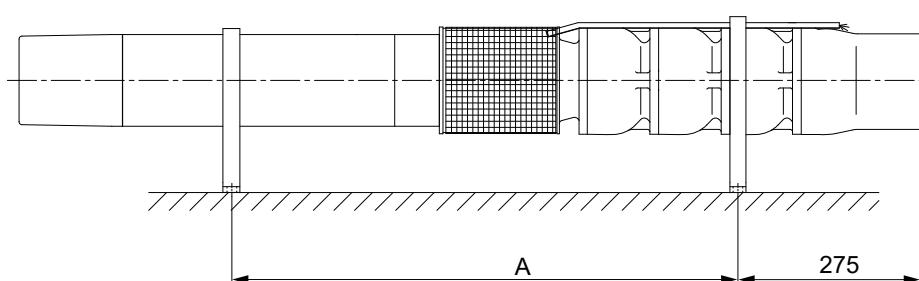

UPA S 200 - 52 / ... , number of stages 1 - 13, 50 Hz, n = 2900 rpm

Operating range

$Q_{\min} = 10 \text{ m}^3/\text{h}$
 Q_{\max} = end of stage curve

The characteristic curves do not take into account the head loss caused by the lift check valve.

- Refer to the corresponding loss curve to determine and take into account the head loss caused by the lift check valve. (⇒ Fig. 4)

Connection types

Standard pump end = G5

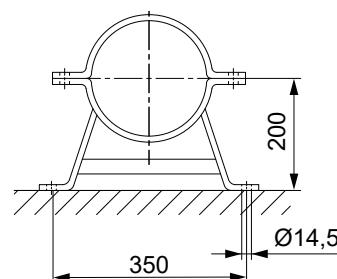

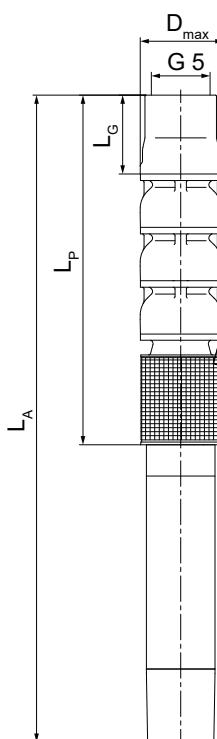

Alternative pump ends:

- G3, G4
- DN 80, DN 100, DN 125
- NPT5-8²⁾

i On versions with an alternative pump end, dimensions D_{\max} , L_A and L_p differ from those with the standard pump end.

D_{\max} for version with alternative pump end:

- G3 / G4: 238 mm
- DN 80 / PN10, PN16: 238 mm
- DN 80 / PN25, PN40: 238 mm
- DN 100 / PN10, PN16: 238 mm
- DN 100 / PN25, PN40: 250 mm
- DN 125 / PN10, PN16: 262 mm
- DN 125 / PN25, PN40: 277 mm
- DN 125 / PN63: 300 mm

² All dimensions are identical to those of the standard pump end G5.

Table 8: Dimensions, weights and installation type depending on the motor [mm], 50 Hz

UPA S 200 - 52 / ...	A	$L_p^{3)}$	$L_A^{3)}$	$L_G^{3)}$	$D_{max}^{3)}$		Total weight	Type of installation	Vertical	Horizontal ⁴⁾
					DOL	$\gamma - \Delta$		Material variant 1.4408 / 1.4517

⁴⁶ Designed for submerged use, 400 V, $\leq +30$ °C

⁴⁷ Parallel cables

⁴⁸ Delta configuration in cable connector with extension cable or in control cabinet

Technical data, 100 Hz

Information on characteristic curves

The characteristic curves shown refer to pump sets driven by a UMA-S synchronous motor, $n = 3000$ rpm.

The characteristic curves shown are intended to allow pre-selection. Refer to the quotation for the precise selection data.

- Tolerance to ISO 9906 Cl. 2B
- Threaded end to DIN ISO 228, Part 1
- Flanged end to DIN EN 1092

Selection chart UPA S 200, 100 Hz, $n = 3000$ rpm

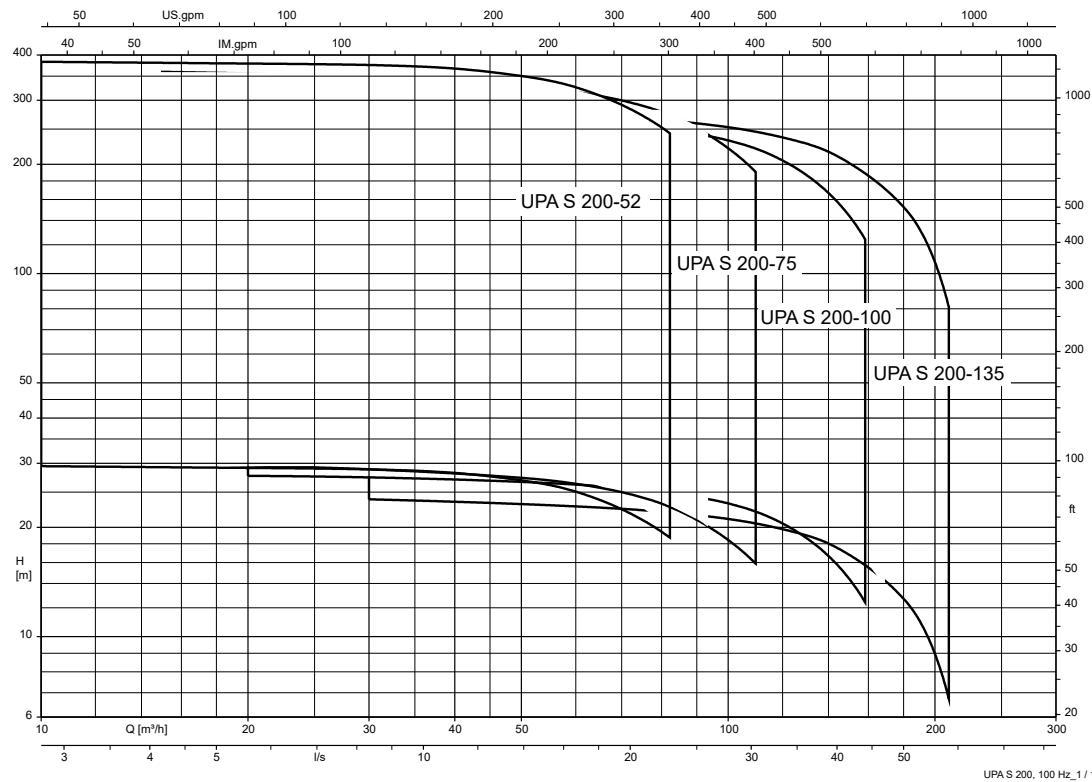

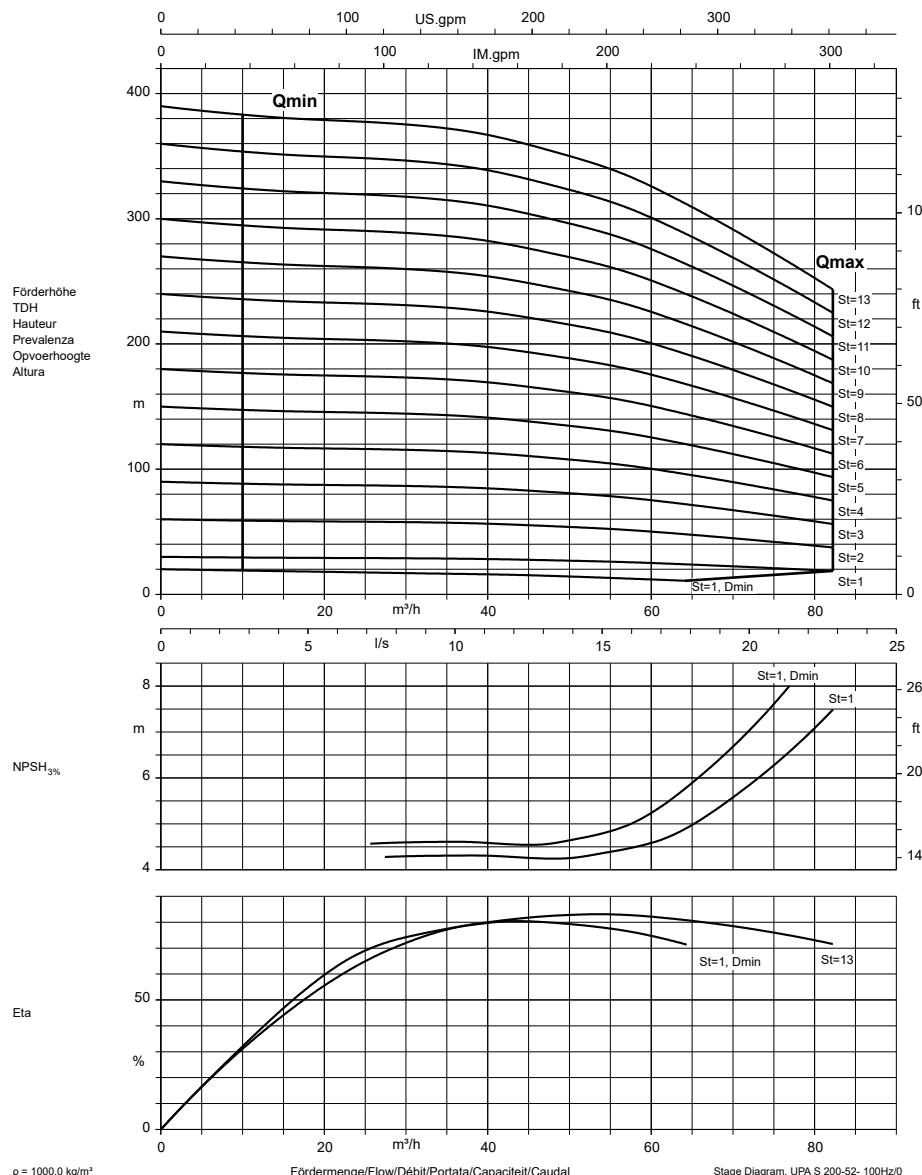

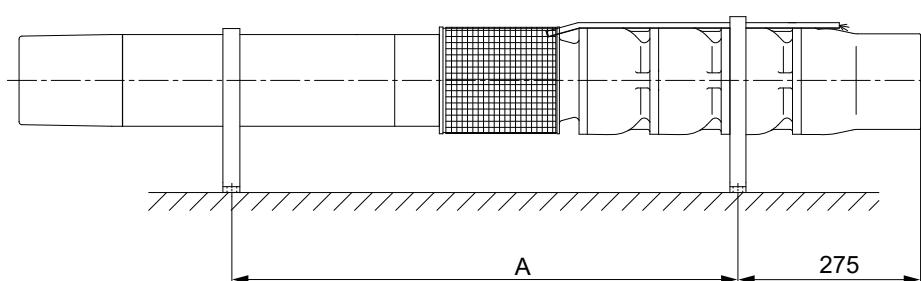

Fig. 3: Selection chart UPA S 200, 100 Hz

UPA S 200 - 52 / ... , number of stages 1 - 13, 100 Hz, n = 3000 rpm

Operating range

$Q_{\min} = 10 \text{ m}^3/\text{h}$
 Q_{\max} = end of stage curve

The characteristic curves do not take into account the head loss caused by the lift check valve.

- Refer to the corresponding loss curve to determine and take into account the head loss caused by the lift check valve. (⇒ Fig. 4)

Dimensions of UPA S 200 - 52 / ... [mm]

Connection types

Standard pump end = G5

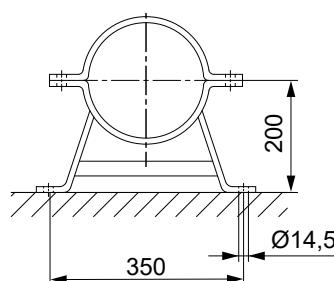

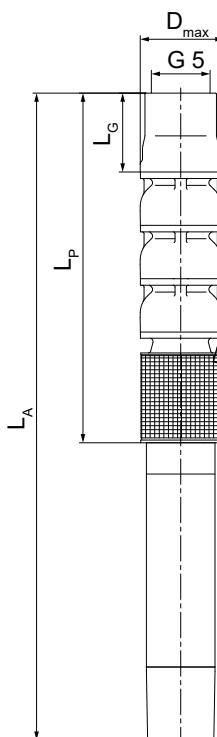

Alternative pump ends:

- G3, G4
- DN 80, DN 100, DN 125
- NPT5-8⁴⁹⁾

i On versions with an alternative pump end, dimensions D_{\max} , L_A and L_p differ from those with the standard pump end.

D_{\max} for version with alternative pump end:

- G3 / G4: 238 mm
- DN 80 / PN10, PN16: 238 mm
- DN 80 / PN25, PN40: 238 mm
- DN 100 / PN10, PN16: 238 mm
- DN 100 / PN25, PN40: 250 mm
- DN 125 / PN10, PN16: 262 mm
- DN 125 / PN25, PN40: 277 mm
- DN 125 / PN63: 300 mm

⁴⁹ All dimensions are identical to those of the standard pump end G5.

i On versions with alternative pump end DN 125 the dimensions for L_p and L_A are identical to those of the version with standard pump end G5.

i On versions with alternative pump ends G3 / G4 / DN 80 / DN 100 the dimensions for L_p and L_A differ as follows:

- $L_p^* = L_p + 87$ mm
- $L_A^* = L_A + 87$ mm

Depending on the model, the following items are included in the scope of supply:

- Pump set with motor lead
- Back-up name plate

Optional:

- Output filter
- Extension cable optional: connected or supplied but not fitted
- Electrical protection equipment
- Frequency inverter for speed control of one pump
- Pedestals
- Cable clips

- Cable connector
- Cooling shroud, suction shroud or pressure shroud
- Automatic control units
- Temperature monitoring
- Supporting clamps and mounting clamps

Accessories

Installation parts

Table 32: Selection table

Description	Mat. No.	Weight [kg]
Set of pedestals for horizontal installation, comprising: 2 pedestals and fastening elements		
1.4301 UPA S 200 with UMA 150 or UMA-S 150 motor	01061866	10
UPA S 200 with UMA 200 or UMA-S 200 motor	01061867	11,2
1.4401 UPA S 200 with UMA 150 or UMA-S 150 motor	05100035	10
UPA S 200 with UMA 200 or UMA-S 200 motor	05100036	11,2
1.4539 UPA S 200 with UMA 150 or UMA-S 150 motor	05073106	10
UPA S 200 with UMA 200 or UMA-S 200 motor	05073107	11,2
Bolts for fastening the pedestals to the foundation are not included in the scope of supply; they must be provided at the site.		
Cooling shroud, suction shroud and pressure shroud		
Adapter G5 to G3, G4, DN 80, DN 100		
1.4404 G5 to G4	05070111	5,16
G5 to G3	05070124	4,53
G5 to DN 80 / PN10, PN16	05070112	8,17

Cable connector, non-separable, including sealing compound, for connecting 1 extension cable to 1 or 2 motor leads			
Size 28 for connection to:			
1 motor lead	Supplied but not fitted	95005106	0,5
	Connected and sealed at the factory	90049385	0,5
Size 35 for connection to:			
1 motor lead	Supplied but not fitted	90049397	0,6
	Connected and sealed at the factory	90049387	0,6
Size 43 for connection to:			
1 motor lead	Supplied but not fitted	90049399	0,8
	Connected and sealed at the factory	90049389	0,8
2 motor leads	Supplied but not fitted	90049400	0,8
	Connected and sealed at the factory	90049390	0,8
Sizes 53 and 78 for connection		On request	
Cable clip for fastening the cable to the riser			
Size 1 (rubber strap / plastic studs), for electric cables: 1 electric cable, flat, 3 x 6 mm ² or 4 x 6 mm ² and 1 electric cable, round, 4 x 6 mm ²		01088095	0,04
Sizes 2 - 11 (metal strap / screw band with tension screw / rubber cable protector), for larger cross-sections up to 70 mm ²		On request	-
Cable clips for pump sets in material variants B, D on request.			
Use 1 cable clip each per cable and per 3 m of riser.			
Dry running protection device (supply voltage 220 V / 240 V) for			
Semi-automatic operation (1 relay, 1 pushbutton + 2 electrodes)		90009553	2
Fully automatic operation (1 relay + 3 electrodes)		90009554	2
Plus 1 control cable for each electrode, blue, 1 x 1.5 mm ² , per metre		01096713	0,1
Pressure controller, insulating enclosure (membrane type), 1 to 8 bar, with pressure connection G 3/8		01151586	1
Pt100 temperature monitoring equipment for use in submersible motors to protect the windings from overheating. Comprises:			
Pt100 temperature sensor with 10 m cable 4 x 0.5 mm ² for motor:	UMA 150 material variants E, C	01532593	1,1
	UMA 150 material variant D	01532594	1,1
	UMA 200, UMA 250, material variants G, C	90063006	1,1
	UMA 200, UMA 250, material variants D	On request	-
Display / switchgear (supply voltage V = 110/220 V)		90064446	0,32
Control cable, blue, round 4 x 0.5 mm²	Per metre	01049403	0,08
Immersion electrodes			
	Set of electrodes: 3 electrodes made of stainless steel	40980055	0,3
	Set of electrodes: 1 electrode made of stainless steel	40980056	0,1

⁶⁸ A special tool is required for assembly.

Power cables

Main applications

- For use with drinking water applications
- Motor lead for submersible motors, cable laid under water
- Extension cable for the motor lead, cable laid freely exposed to air

Operating data

Table 39: Operating properties

Characteristic	Value	
Rated voltage	V_N [V]	≤ 1000
Ambient temperature	T [°C]	≤ 50
Immersion depth	IM [m]	≤ 500

Designation

Example:

ZN 1391 - G FL GWT - J 4G25 - Cu-Rubber

Table 40: Designation key

Code	Description	
ZN	Works standard	
G	Insulation, rubber	
FL	Type of power cable	
	FL	Flat
	RD	Round
GWT	Suitable for drinking water	
J	Information about earth conductor	
	J	With earth conductor
	O	Without earth conductor
4G25	Number of cores	
	4G25	With earth conductor, 4-core, cross-section 25 mm ²
	3x25	Without earth conductor, 3-core, cross-section 25 mm ²
Cu-rubber	Material	

Design details

- 3-core or 4-core rubber-sheathed cable

Comprising:

- Stranded copper conductor
- Bare
- Core insulation and outer sheath made of a special EPR-based rubber compound (ethylene propylene rubber)
- Blue

Table 41: Cable designs

Cable type	Characteristic
Flat cable	
	3 cores, flat
	4 cores, flat
Round cable	
	1 core, round
	4 cores, round

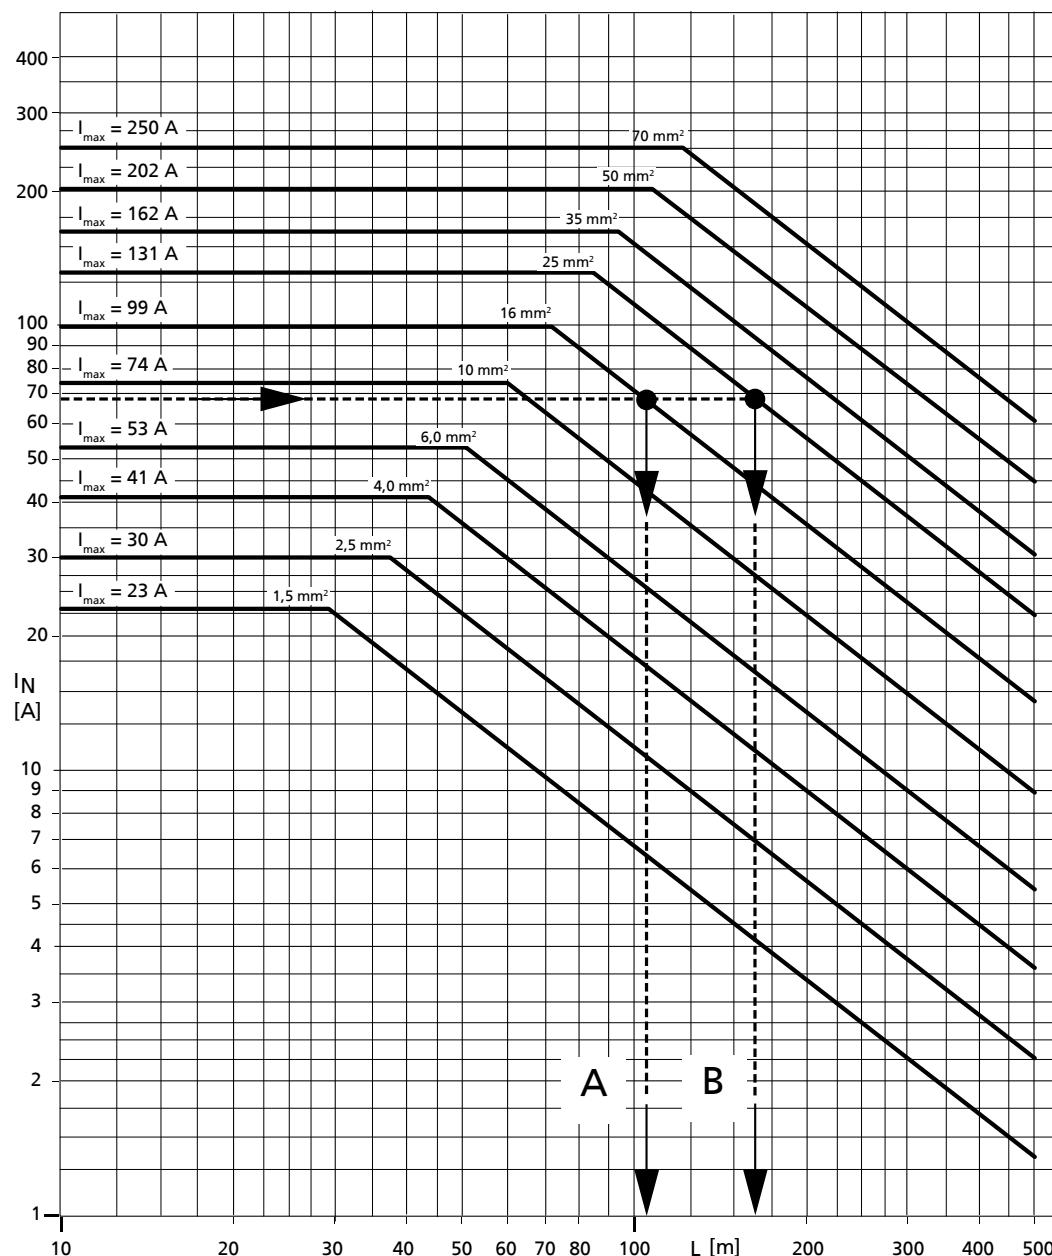

Selection information

Permissible cable lengths for starting method: DOL

Applies to 1 cable or 2 cables in parallel⁶⁹⁾

Conditions:

- $V = 400 \text{ V}$; $\Delta V = 3 \%$; $T \leq 30^\circ \text{C}$; laid freely exposed to air and in contact with surfaces

Example A

$I_N = 68 \text{ A}$
Cable design: $1 \times 16 \text{ mm}^2$
Cable length: $L \leq 105 \text{ m}$

Example B

$I_N = 68 \text{ A}$
Cable design: $1 \times 25 \text{ mm}^2$
Cable length: $L \leq 165 \text{ m}$

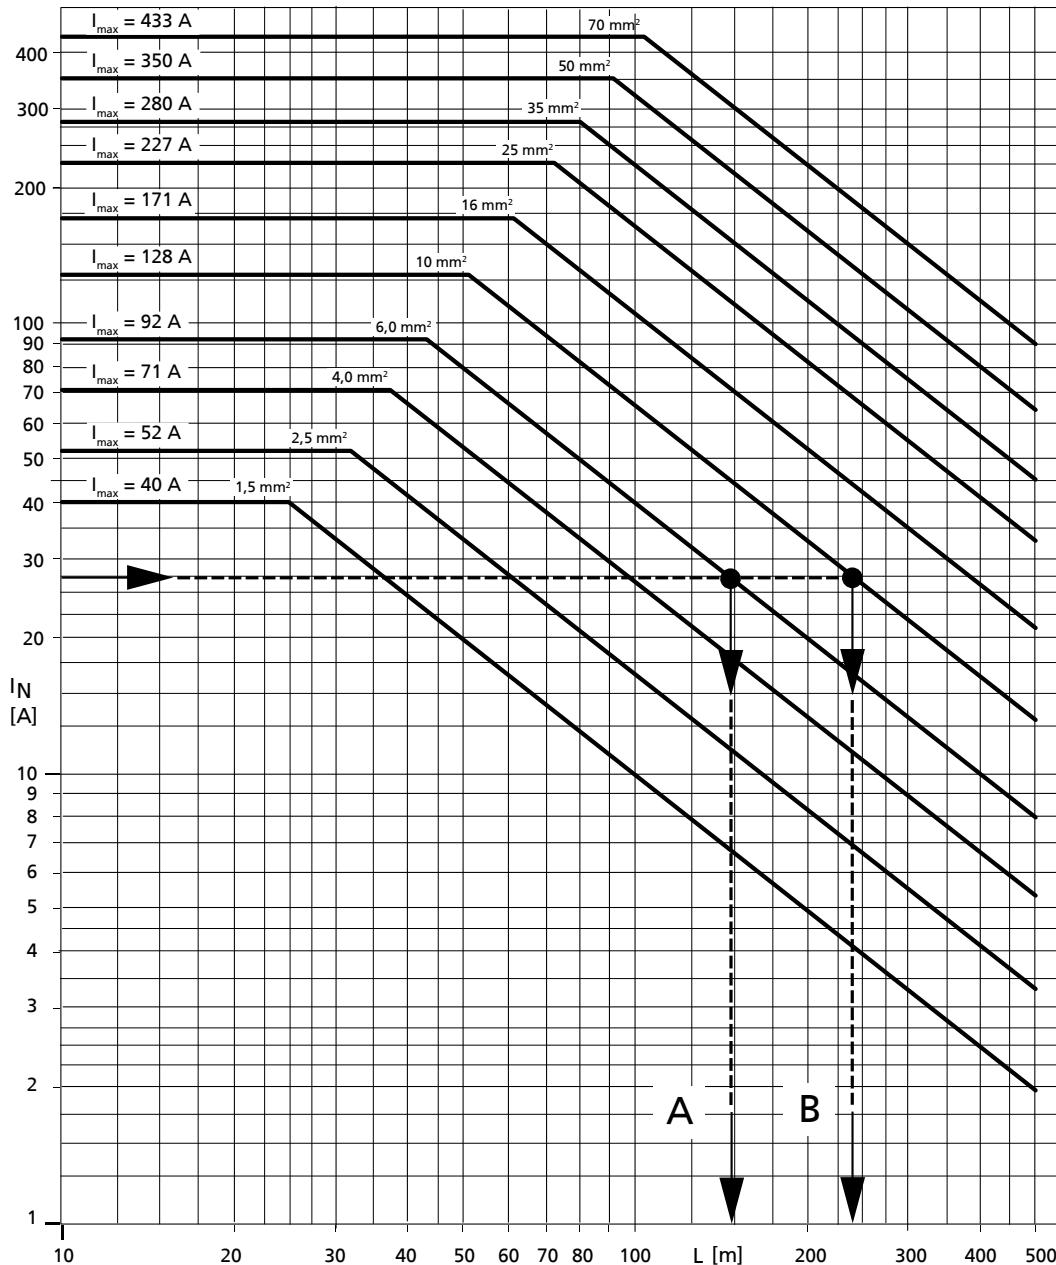

⁶⁹⁾ For parallel cables the value is doubled to obtain the permissible length.

Permissible cable lengths for starting method: YΔ

Applies to 2 cables

Conditions:

- $V = 400 \text{ V}$; $\Delta V = 3 \%$; $T \leq 30^\circ\text{C}$; laid freely exposed to air and in contact with surfaces

Example A

$I_N = 27 \text{ A}$
 Cable design: $2 \times 6.0 \text{ mm}^2$
 Cable length: $L \leq 145 \text{ m}$

Example B

$I_N = 27 \text{ A}$
 Cable design: $2 \times 10 \text{ mm}^2$
 Cable length: $L \leq 235 \text{ m}$

Voltage drop in the extension cable

When calculating the required conductor cross-section q not only I_N , but also the voltage drop ΔV along the cable length L (distance from motor to control unit) must be taken into account. Proper functioning of our submersible motors requires $\Delta V \leq 3\%$ of the supply voltage V . If $\Delta V > 3\%$, a larger conductor cross-section must be used.

The voltage drop is calculated using the following equations:

Starting method DOL/autotransformer

- 1 cable:

$$\Delta U = \frac{3,1 \times L \times I_N \times \cos \varphi}{q \times U} [\%]$$

- 2 cables in parallel (II):

$$\Delta U = \frac{1,55 \times L \times I_N \times \cos \varphi}{q \times U} [\%]$$

Starting method YΔ (2 cables):

$$\Delta U = \frac{2,1 \times L \times I_N \times \cos \varphi}{q \times U} [\%]$$

Power loss ΔP:

$$\Delta P = \frac{\Delta U}{(\cos \varphi)^2} [\%]$$

Table 42: Key

Code	Description
L	Single cable length [m]
I_N	Rated current [A]:
$\cos \varphi$	Power factor at 4/4 load
q	Conductor cross-section [mm^2]
U	Supply voltage [V]

Maximum permissible rated motor current

Table 43: For ambient temperature $t \leq 30^\circ\text{C}$

Starting method	Used as ...	$I_{\max} [\text{A}]$ for the following conductor cross-sections [mm^2]										
		1,5	2,5	4	6	10	16	25	35	50	70	95
DOL (1 cable or 2 cables in parallel)	Motor lead	29	38	52	67	94	125	166	205	256	316	517
	Extension cable	23	30	41	53	74	99	131	162	202	250	409
YΔ (2 cables)	Motor lead	50	66	90	116	163	217	288	355	443	547	895
	Extension cable	40	52	71	92	128	171	227	280	350	433	708

Cable connector

Application

For providing a sealed, water-tight connection between extension cables and motor leads of submersible motors.

- Ambient temperature: $T \leq + 50^\circ\text{C}$
- Immersion depth: $\leq 500 \text{ m}$

Selection table

The table below only shows the **cables on stock**. Connectors for other cables on request.

Table 46: Key

Cable symbols	Key	Cable designation

Cable clips

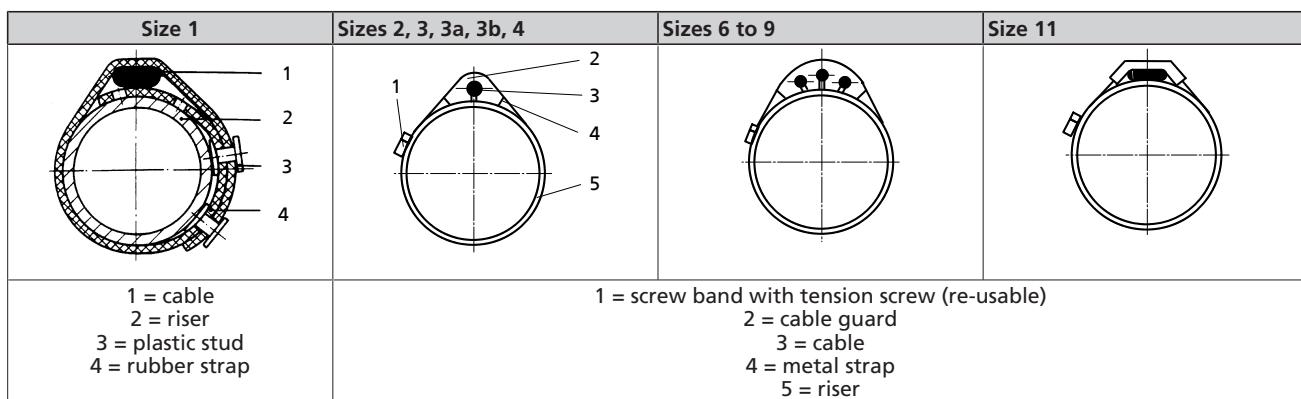

Applications

- Securing cables at the riser / discharge pipe.
- Suitable for use in normal or slightly aggressive water.
- Versions for use in more aggressive water (e.g. seawater) on request.

Table 48: Selection table

Table 49: Cable clip sizes

Flow velocity past the motor

Application

- Required motor cooling

Flow velocity past the motor

$v = 0 \text{ m/s}$

- The flow velocity past the motor is undefined.
- A free flow of heat is established. This heat flow must not be influenced or hindered by any structures, and a supply of fresh water must be provided at all times.
 - Example: pump set freely suspended in a vertical position inside a large tank

Flow velocity past the motor

$v > 0.2 \text{ m/s}$

$v > 0.5 \text{ m/s}$

- The flow velocity past the motor is defined for the installation conditions, see table below. Decisive factors are the inside well diameter or the inside shroud diameter, the operating data and the outside dimensions of the pump set.
 - Example: pump set installed in a vertical position above the screen/filter in a well; values in accordance with the table below.
 - Example: pump set installed in a horizontal position in a tank, fitted with a cooling shroud, or pump set installed in a vertical position in a pump sump, fitted with a cooling shroud; values in accordance with the table below.
