

A highly versatile control unit: LevelControl Basic 2 from KSB.

KSB's LevelControl Basic 2 now makes automation even easier and more efficient. To expand the control unit's range of applications, KSB has complemented the current model with new components and additional options.

Discover the new diversity of LevelControl Basic 2!

The options for LevelControl Basic 2 are growing with the needs of our customers. This is why we offer a new range of accessories and options in addition to our efficient control unit. For example:

Ampere meter, Signalling module

Installation options:

- Signalling module
- Potential-free single signalling
- Heating for use in an extended temperature range down to -30 °C
- Current measuring module/Ampere meter for each pump
- Main switch variations

BC housing with main switch

Housing options

- Alternative housing with double door and IP66
- Outdoor housing with additional clearance
- Blubber system in BC housing – the option with optimum price-performance ratio

Deep well sensor

Sensors:

- Deep well sensors (ATEX and non-ATEX models)
- Ultrasound sensor
- Diverse installation accessories such as: stop clamps, brackets, etc.

Communication interface

Also available on request:

- BACnet connection
- Telephone modem
- GSM modem
- and much more
