

**MODEL****TK**

## THROUGH CONDUIT KNIFE GATE VALVE

The TK model knife gate is a bi-directional wafer type valve designed for media with high consistency. The double seat design assures a non-clogging shut off on either normal or reverse flow. The valve is used in a wide range of demanding applications in industries such as:

- Pulp & Paper
- Wastewater Treatment Plants
- Chemical plants
- Power Plants
- Etc.

**Sizes:**

DN 80 to DN 600 (larger diameters on request)

**Working pressure:**

DN 80 to DN 250      10 bar  
 DN 300 to DN 600      6 bar <sup>(1)</sup>  
 (1) 8 bar with duplex gate

**Standard flange connection:** DIN PN 10 and ANSI B16.5 (class 150)

Other flange connections are available on request such as:

DIN PN 6                      DIN PN 16                      DIN PN 25  
 BS "D" and "E"

**Directives:** 2006/42/EC (MACHINES)  
 2014/68/EU (PED) Fluid: Group 1(b), 2 (Cat. I, mod. A)  
 2014/34/EU (ATEX)

All valves are tested prior to shipping in accordance with the standard developed by the Quality Control Department at ORBINOX

### STANDARD PARTS LIST

Part:	Material:
1- Body	CF8M (1.4408)
2- Gate	AISI 316 (1.4401)
3- Seat	PTFE + O ring
4- "K" Ring	CF8M (1.4408)
5- Packing	Dynapack (Graphite impregnated PTFE and Aramid yarn combination with an elastomeric core) + (Silicone O-ring)
6- Gland Follower	CF8M (1.4408)
7- Stem nut	Brass
8- Stem	AISI 430 (1.4016)
9 - Yoke	AISI 304 (1.4301)
10- Axial fixing bush	AISI 304 (1.4301)
11- Friction washer	PET + solid lubricant
12- Bushing	Bronze
13- Spring Pin	AISI 420 (1.4021) (ISO 8752)
14- Handwheel	Ø≤310: Aluminium (AlSi12) / Ø≥410 GJS400 (GGG40)
15- Knob	Black bakelite
16- Gasket	DN 80-200: Graphite / DN 250-600: PTFE
17- Sliders	Glass filled PTFE

## DESIGN FEATURES

### BODY:

Wafer style cast two-part bolted body, both internally machined, with reinforcing ribs in larger diameters for extra body strength. With internal glass filled PTFE sliders that ensure smoother gate traveling. Full port design to allow a greater flow capacity and to guarantee a minimal pressure drop.

### SELF-CLEANING GATE:

Stainless steel as standard. One piece through-going gate with o-port design. When closing, the gate cuts and moves a disc of material downwards, which is again returned to the flow when opening. Gate is polished on both sides to avoid jamming and to ensure a greater seal between the gate with both packing and seat. The material of the gate can be changed on request for higher pressure requirements.

### SEAT:

Unique design that mechanically locks the seal in the interior of the valve body with a cast, easy to replace, stainless steel seat ring. Standard PTFE + Nitrile O-ring (Fig.1)

### PACKING:

Long-life packing with several graphite impregnated PTFE and Aramid yarn combination with an elastomeric core, with an easy access packing gland ensuring a tight seal. Long-life braided packing is available in a wide range of materials.

### STEM:

The standard stainless Steel stem offers a long corrosion resistant life. Standard configuration is nonrising stem.

For those pneumatic actuated valves, stem linkage is provided by means of a stainless steel coupling and a pin (Fig. 2).

### ACTUATORS:

All actuators supplied by ORBINOX are interchangeable, and supplied with a standard mounting kit for installation purposes on site.

### YOKE or ACTUATOR SUPPORT:

Made of stainless steel (EPOXY coated steel available on request). Compact design makes it extremely robust even under the most severe conditions.

### EPOXY COATING:

The epoxy coating on all ORBINOX cast iron and carbon steel components is electrostatically applied, making the valves corrosion-resistant with a high quality finished surface. The ORBINOX standard colour is RAL-5015 blue.

### GATE SAFETY PROTECTION:

ORBINOX automated valves are provided with gate guards in accordance with EU Safety Standards. The design feature prevents any objects from being caught accidentally while the gate is moving.

Fig. 1

Fig. 2

## OTHER OPTIONS

### Gate guards for actuators with proximity switches:

Allows horizontal and parallel mounting of the proximity switches including their protection

### Bonnet:

Assures tight sealing to atmosphere if used with hazardous gas or fluids.

Reduces packing maintenance

### Diamond port:

Excellent flow regulation

### Flush ports:

Allow for cleaning of solids trapped within the body cavities that can obstruct the flow or prevent the valve from closing. Purging can be made with air, steam, liquids, etc. depending on the process

### Other materials of construction:

Special alloys such as AISI 317 (1.4449), 254SMO (1.4547), Hastelloys, etc.

### Fabricated valves:

ORBINOX designs, produces and delivers special fabricated valves for special process conditions (big sizes and/or high pressures)

## SURFACE TREATMENTS

Valve components can be protected or coated for a longer life expectancy, depending on the application of the valves and the valve service conditions.

At ORBINOX we can offer alternative treatments and coatings for the different valve components to improve their properties against abrasion (Stellite, polyurethane...), against corrosion (Halar, Rilsan, galvanizing...) and against adherence (polishing, PTFE...)

## ATEX

Please contact an ORBINOX representative for info and availability. Some considerations:

- Hand operated TK valves have been subjected to an ignition risk assessment according to DIN EN 13463: 1-5 and they are out the scope of application of ATEX Directive. Therefore hand operated valves are suitable for ALL ATEX zones
- Electrical, pneumatical and hydraulically operated valves must be subjected to a conformity assessment of their own and also of the whole unit valve-actuator to get EC Type Approval to Directive 2014/34

## ACTUATOR TYPES

### MANUAL:

Handwheel (rising & non-rising stem)  
 Chainwheel  
 Lever  
 Bevel Gear  
 Others (square nut...)

### AUTOMATIC:

Electric (rising & non-rising stem)  
 Pneumatic (single & double-acting)  
 Hydraulic

All actuators supplied by ORBINOX are interchangeable

## FAIL SAFE SYSTEMS

Used on pneumatic actuated valves

### SINGLE ACTING (SPRING RETURN)

- Available from DN 50 to DN 300
- Supply pressure:  
min. 5 bar - max. 10 bar
- Options:
  - Pneumatic or electric fail open
  - Pneumatic or electric fail close
  - Other options on request

### DOUBLE ACTING WITH AIR TANK

- Available for all valve sizes
- Supply pressure:  
min. 3.5 bar - max. 10 bar
- Options:
  - Pneumatic or electric fail open
  - Pneumatic or electric fail close
  - Other options on request

## ACCESSORIES

- Mechanical stops
- Locking device (Fig.1)
- Manual override
- Solenoid valves
- Positioners
- Limit switches
- Proximity switches
- Floor stands
- Extensions (Fig.2)

Fig.1

Fig. 2

*For further information about fail safe systems and valve extensions, see EX catalogue*

For more detailed information, please contact our Technical Department

**TEMPERATURE CHART**

**SEAT / SEALS**

**PACKING**

Material	Max.Temp.(°C)	Applications
PTFE (T) + O-ring*		
*Nitrile (N)	120	Corrosion resistance (1)
*Viton (V)	200	Corrosion resistance
*Silicone (S)	250	Corrosion resistance
Polyurethan (PU)	90	Abrasion resistance
EPDM (E)	120	Acids and non mineral oils
Nitrile (N)	120	Resistance to petroleum products
Viton (V)	200	Chemical service/High temp.

Material	Max.Temp.(°C)	pH
Dynapack (DP)	270	2-14
Braided PTFE (TH)	260	0-14
Graphited (GR)	600	0-14
Ceramic fibre (FC)	1200	--

NOTE: all types include an elastomere O-ring

(1) PTFE + Nitrile O-ring standard ORBINOX arrangement

**SEAT TYPES**

- TYPE "K" SEAT (PTFE)**
- Replaceable resilient PTFE + O-ring seats
  - Replaceable stainless steel rings

- DEFLECTION CONE "C"**
- Deflects the media away from any valve internal exposed parts (gate guides, seat,...)
  - Material: AISI 316, CA15, Ni-Hard, etc.
  - Face-to-face dimension increases:  
DN 50 to DN 250 X = 9mm  
DN 300 to DN 600 X = 12mm  
Larger diameters on request

- TYPE "K" SEAT (EPDM)**
- Standard replaceable resilient EPDM seats
  - Replaceable stainless steel rings

- POLYURETHANE**
- Replaceable polyurethane seat ring.

**HANDWHEEL (non-rising stem)**

- Standard manual actuator:
  - DN 80-300: Aluminium handwheel
  - DN $\geq$ 350: GJS400 handwheel
- Recommended for installation where space is limited
- Consists of:
  - Handwheel with knob
  - Stem
  - Yoke bushing
  - Stem nut fixed to the gate
- Available from DN 80 to DN 600
- Options:
  - Locking Device
  - Extension
  - Square Nut Drive
- Gear is recommended above DN350

600	122	836	320	530	771	98	550	1460	1830	790

**GEAR (non-rising stem)**

- Recommended for valves larger than DN 350 and working pressures greater than 3.5 bar

- Consists of:

- Stem
- Yoke
- Bevel Gear Actuator with Handwheel (Standard Ratio 4:1)

- Available from DN 200 to DN 600

- Options:

- Locking Device
- Extension
- Chainwheel

DN	A	B	C	D	E	F	ØG	H	I	O max.

**PNEUMATIC CYLINDER**

- The standard pneumatic actuator (double acting on-off cylinder) consists of:
  - DN ≤ 250: Aluminum barrels
  - DN ≥ 300: Composite barrels
  - Aluminium covers
  - Stainless Steel (AISI 304) piston rod
  - Nitrile coated steel piston
- Available from DN 80 to DN 600
- Supply Pressure: min. 3.5 bar - max. 10 bar. Actuator designed with 6 bar air supply and for standard catalogue differential pressure
- For valves installed in a horizontal position, we recommend U-type support plates and/or actuator support
- Options:
  - Gate guards for proximity switches
  - Hard anodized barrel and covers
  - Stainless Steel barrel and covers
  - Over / Undersized cylinder
  - Manual override
  - Fail Safe System
  - Limit switches
- Instrumentation (on request):
  - Positioners            - Solenoid valves
  - Flow regulators    - Air preparation units

**ELECTRIC ACTUATOR (non-rising stem)**

- Consists of:
  - Electric motor
  - Motor support yoke  
acc. to ISO 5210/DIN 3338
- The standard electric motor is equipped with:
  - Manual emergency operation
  - Limit switches (open/closed)
  - Torque switches
- Available from DN 80 to DN 600
- For valves installed in a horizontal position, we recommend U-type support plates and/or actuator support
- Wide range of types and brands available to meet customer's needs
